

ARBOSHIELD

BIO TREE GUARDS

NATURAL SOLUTION FOR TREE PROTECTION

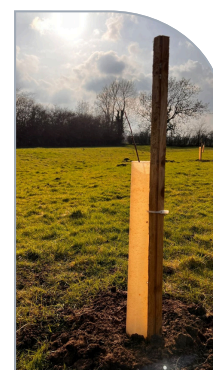

• MADE FROM RESIN AND WOOD CHIPS • 100% BIODEGRADABLE • LIFESPAN OF 5 YEARS •

ARBOSHIELD BIO tree guards are the first and only soil certified tree and vine guards available on the market. Based on plant resin and recycled natural wood residue, these tree guards are a natural solution for the protection of trees and vines against mice, voles, rabbits, hares and deer. The tree guards have an average lifespan of 5 years and they also biodegrade in rivers and oceans.

More about the AROBSHIELD BIO tree guards:

- Biodegrade in any environment - soil, rivers and oceans - after 5 years
- The 100% biodegradability allows them to stay on the trees, making overall costs lower than regular guards. Savings come from reduced labor and disposal costs.
- Made of plant-based resin and (local) recycled wood chips.
- Circular: break down into nutrients that nurture animals and help plants grow.
- Optimal light transmission
- Multiple pre-fitted cable tie options
- Blend seamlessly in the environment

TECHNICAL SPECIFICATIONS

Material	plant-based resin and wood
Sizes	60 cm 120 cm
Diameter	75 - 100 mm
Packing	120 pcs/box 60 pcs/box
UV stabilisation	5 years
